

CORPORATE SERVICES

FOR DEFENCE MANUFACTURERS IN UKRAINE

ALPHA: COMPLETE OPERATIONAL INFRASTRUCTURE
FOR DEFENSE MANUFACTURERS IN UKRAINE

Your Turnkey Defense Setup:

Whether you are a foreign or Ukrainian defense manufacturer, ALPHA provides the complete operational backbone you need to seamlessly establish and scale production in Ukraine.

We deliver a unified ecosystem encompassing your corporate, financial, customs, legal, staffing (critical reservation), and IT infrastructure.

YOU CREATE THE TECHNOLOGY FOR VICTORY — ALPHA BUILDS THE RELIABLE REAR FOR YOUR BUSINESS

LEGAL PROTECTION & BUSINESS STRUCTURING

A solid legal foundation for domestic and foreign economic activities (FEA):

- Corporate Registration** / Fast incorporation, reorganization, scaling, or liquidation of defense companies and their subdivisions.
- International Trade & Currency Control** / Drafting and auditing currency contracts for purchasing foreign components, and monitoring import operation closure deadlines.
- Contractual Work** / Drafting supply agreements, NDAs, licensing agreements, and end-user contracts (Ministry of Defense, intelligence agencies, foundations).

CUSTOMS OPERATIONS & CLEARANCE (CUSTOMS SPECIALISTS)

We ensure uninterrupted supply chains for components and the seamless dispatch of finished military products, preventing financial and time losses at the border:

High-Volume Operations (Import/Export)

- / Comprehensive customs declaration and brokerage support for regular shipments of specialized equipment, optics, electronics, armor steel, and raw materials [International Trade].

Support for Innovative R&D

- / Customs clearance of test samples, experimental equipment, circuit boards, and high-demand chips for R&D centers.

Cost Optimization (Cost-effective Official Mechanisms)

- / Implementation of legal frameworks to minimize customs fees (utilizing active state exemptions for defense-related imports, VAT, and duty relief).

Simplified Procedures

- / Processing via express carriers and postal services for the fast and cost-effective delivery of small-batch prototype parts.

CRITICAL ENTERPRISE STATUS & PERSONNEL RESERVATION (DRAFT DEFERMENT)

Safeguarding your most valuable asset — engineers, designers, technologists, and assembly workers

Critical Status

- / Auditing your enterprise for compliance with the criteria of the Ministry of Strategic Industries and the Ministry of Digital Transformation, and preparing the full document package to obtain the status of an enterprise critically important to the economy and defense.

Turnkey Reservation

- / Processing mobilization deferments for military-liable employees via the Diia system or relevant ministries.

Ongoing Support

- / Continuous monitoring of legislative changes and keeping reservation statuses up to date.

Business Setup / Optimal selection of the legal entity type (LLC/Sole Proprietorship) and tax system, factoring in IT/Defense industry incentives.

Grant & Credit Management / Preparation of flawless business plans and cash flow forecasts, application support, and successful bank compliance clearance.

Targeted Funds Administration / Maintaining separate accounting for grant funds, along with report preparation for donors and the Ministry of Economy.

Capital Raising / Legal and financial support in securing preferential bank loans to develop and scale manufacturing capacities.

TURNKEY ACCOUNTING & FINANCIAL MANAGEMENT

A complete financial back-office ensuring secure operations with state and international funds

CURRENT GRANT PROGRAMS FOR THE DEFENSE SECTOR

We handle the full cycle of integrating your enterprise into available market grant programs:

DefTech Forges (BraveTech EU)	Diia.Business Grant (Dual-Use)	Brave1 Cluster / "Made for Victory"	"eRobota" State Program (Processing Grant)
An international tech challenge for manufacturers of defense and dual-use solutions (TRL 4+). Funding targets autonomous systems, electronic warfare (EW) defense, robotic platforms, and AI technologies [International Trade / FEA].	A specialized European support program for small and medium-sized enterprises (SMEs) manufacturing dual-use products.	Regular state funding for developments at any stage — from a working lab prototype to assembly line launch for the Defense Forces.	Non-refundable funds for purchasing manufacturing and machining equipment, expanding production facilities, and creating new jobs.

STRATEGIC FINANCE

Transitioning from small-batch production to industrial defense manufacturing scales

Scaling Strategy

- / Developing a step-by-step plan for expanding production capacities.

Financial Modeling

- / Calculating the break-even point, optimizing the unit cost of military products, and planning capital expenditures (CapEx).

Crisis Management

- / Building a resilient financial model to withstand supply chain instabilities for military components.

IT DEVELOPMENT & MAINTENANCE (DEFENSE TECH INFRASTRUCTURE)

Specialized tech solutions for the military sector, guaranteeing maximum data protection, uninterrupted infrastructure operation, and total confidentiality:

- Web Development** / Creating highly resilient and secure websites, specialized web portals, and platforms for safe interaction with partners, investors, or government clients.
- Software Development** / Designing and deploying custom applications, specialized CRM systems for defense manufacturing management, warehouse/financial accounting systems, and military-grade software. We cover the full lifecycle: from architecture and coding to ongoing maintenance and upgrades for new tasks.
- Cybersecurity** / Stringent protection of the enterprise's digital assets. Conducting regular infrastructure penetration testing, implementing continuous data leak monitoring systems, and securing websites, servers, and corporate networks against targeted attacks.
- System Administration (DevOps)** / Professional configuration, optimization, and multi-tiered protection of server capacities. Ensuring system fault tolerance, process automation, and secure administration of both isolated (on-premise) and cloud environments.
- OSINT for Military Needs** / Conducting in-depth open-source intelligence research. Collecting, analyzing, and verifying information for risk assessment, threat detection, environment analysis, and counterparty due diligence.

Security and Confidentiality are Our Priorities: We fully understand the strict requirements of working with Defense Industrial Base (DIB) enterprises. All development and communication processes are conducted exclusively through our own highly secure CRM systems and encrypted communication channels. We guarantee the absolute protection of your data, and every interaction is governed by an uncompromising, airtight NDA.

PERSONNEL SECURITY & COUNTERINTELLIGENCE

Helping defense companies hire the right people — and ensuring your team knows how to protect the organization from within.

Risk Assessment & Deep Screening:

/ Proactively detecting insider threats, verifying candidate integrity, and analyzing compromising affiliations before they pose a risk to your enterprise.

Counterintelligence

& Awareness Training: **/** Equipping employees with the practical skills to recognize and counter recruitment attempts, psychological manipulation, information elicitation, social engineering, and other intelligence threats.

THE **ALPHA** ADVANTAGE: A TRUE ONE-STOP-SHOP

You no longer need to coordinate between disparate customs brokers, defense attorneys, accountants, and grant writers. ALPHA integrates all these functions into a single, seamless service.

The result? Your engineering teams focus 100% on developing military hardware and saving lives, while ALPHA fully manages the risks, logistics, and scaling of your business in Ukraine.

Let's build your production infrastructure today.
